

Downloading video and pictures from iPad to Mac

1. Plug iMac into your Mac

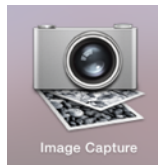

2. Click on Launchpad

3. Click on Other Folder

4. Click on Image Capture

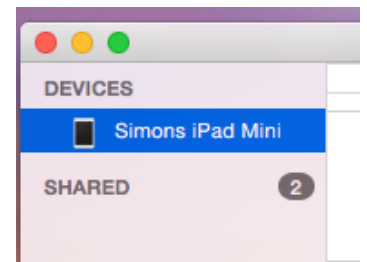

5. Click on your iPad device name

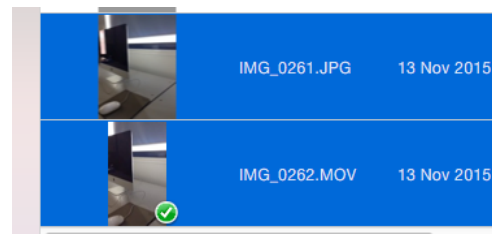

tips:

If videos and pictures do not appear you will need to put your passcode in on your iPad and tap Trust.

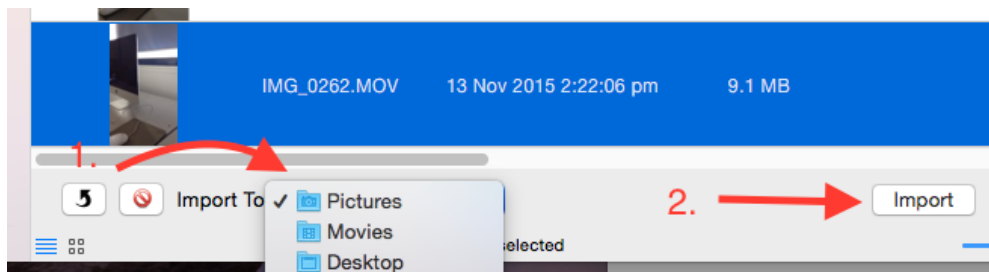

This may also require you to unplug and replug your iPad cable back in

6. Select the item you wish you import. You can select as many as you want by either holding down the CTRL or SHIFT key

7. Select the Import location. Click Import

8. Once complete browse to location and check
