

## Getting iMovie Working

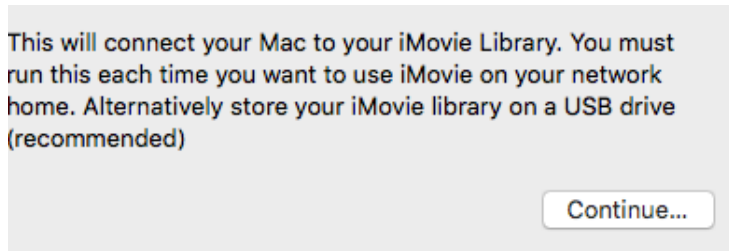

\* Work Around \*

If this method is not available please refer to manual process and contact IT to have deployed

On your desktop there should be an icon called "iMovie Library Setup",  
This also available in Applications

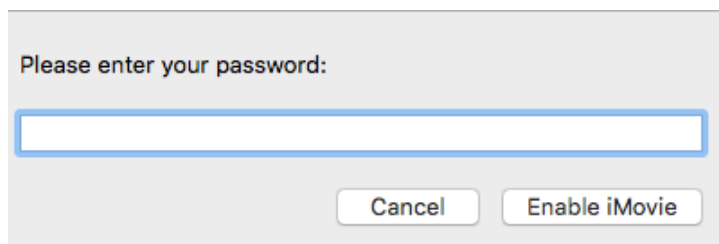

A message will pop up explaining that when using iMovie the shortcut needs to be run.  
Alternatively an external USB can be used.

When you double click on shortcut, you  
will be asked for your network  
password.

Click "Enable iMovie"

Wait for a few seconds or so....

iMovie will automatically load and mount the  
students Movies folder
